

MST PRO-BALL

MST

HIGH PERFORMANCE TURF

Rows of durable slit film fibers interspersed with our proprietary blend of texturized ("curly") fibers.

Baseball and softball players will appreciate the limited infill splash generated from ball bounce with our MST PRO-BALL turf system. In addition, our proprietary blend enables us to customize the installed system to meet the desired speed/firmness of our customers.

Recommended Applications:

MST PRO-BALL is an outstanding choice for baseball and softball applications.
