

# MST PERIMETER-PRO MST

HIGH PERFORMANCE TURF

**Our proprietary, extremely dense blend of our extremely durable slit-film fibers and our texturized ("curly") fibers.**

The MST Perimeter-Pro is intended to be used in high traffic areas, such as pitching mounds, batter's boxes and even running lanes for baseball and softball fields. MST Perimeter-Pro's proprietary formulation, in combination with our special infill mix, will significantly increase the life and playability of those high traffic, often abused areas.

## Recommended Applications:

MST PERIMETER-PRO is specifically intended as a premium "perimeter" alternative for one or more of the following high traffic baseball and softball areas: pitcher's mounds, batter's boxes, catcher's areas and/or running lanes.

## MST PERIMETER-PRO SPECS

<b>FIBER</b>	Proprietary dense blend of U.V. resistant slit film fibers with texturized fibers
<b>PRIMARY BACKING</b>	Double Layer Thiobac, black, U.V. stabilized, 8.0 oz/yd <sup>2</sup> ; Layer 1 - 100% PP, Layer 2 PET/PP blend
<b>SECONDARY BACKING</b>	Polyurethane coating with drainage holes
<b>TUFT BIND</b>	≥ 9 lbs
<b>FIBER HEIGHT</b>	1.0" 1.50"
<b>FIBER WEIGHT</b>	58 - 80 oz/yd <sup>2</sup>
<b>WATER PERMEABILITY</b>	13.2 gal/yd <sup>2</sup> /min (unfilled)

**EXTREMELY DENSE BLEND OF SLIT-FILM FIBERS AND TEXTURIZED ("CURLY") FIBERS WITH A LOW PROFILE FORMULATION**

**100% MADE IN THE USA**
